

10 November 2022

Wyden (previously AlgoTrader) is a fast-growing scale-up and the global leader in institutional digital asset trading technology. It is the prime solution partner for banks and other sell-side firms for digital asset and crypto execution management in addition to its leading position as the first fully integrated algorithmic trading software solution for quantitative hedge and crypto funds on the buy-side.

Wyden has also just been voted the #1 scale-up in Switzerland.

By covering the entire trade lifecycle and supporting seamless custody, core banking and portfolio management system integration as well as full trade lifecycle automation, the Wyden platform streamlines digital assets trading. Engineered by a team of trading system veterans and crypto asset experts, Wyden offers best-in-class integrated infrastructure solutions that meet the highest institutional needs. Wyden also offers consulting services to assist with the timely implementation of both Wyden solutions. Our typical clients are Banks, Hedge Funds, Asset Managers, Crypto Funds, Prop Trading Groups and Brokers.

Headquartered in Zurich, Switzerland, we have regional offices in New York and Singapore as well as development teams in Eastern Europe.

We're searching for a

Senior Banking Project Manager / Consultant

Job overview

As a Senior Banking Project Manager / Consultant, you will be the main responsible for the implementation of our Wyden solution for banks. You'll be the interface between the customer and our interdisciplinary team. You will be the person to drive our banking projects with the aim of helping banks to offer crypto and digital assets to their clients.

You'll be working in a global distributed environment (very limited travel) and be located in the Zurich headquarter with partial work-from-home options.

Responsibilities

- ✓ Responsibility for project delivery and consulting to our banking clients
- ✓ Assist the sales team during the offering phase as a Banking Consulting and Business Analyst
- ✓ Assist the bank to finding the optimal software setup, infrastructure, and business processes to meet the banks requirements
- ✓ Manage client implementation projects as the primary project manager
- ✓ Map client requirements to capabilities of our platform WIRESWARM and support the product management in further positioning the product

Knowledge and experience

- ✓ MUST HAVE: Experience in running large IT implementation projects for banks
- ✓ MUST HAVE: Consulting and business analysis for banking and software implementation projects
- ✓ MUST HAVE: Experience in the trading domain and in particular with crypto and digital assets
- ✓ MUST HAVE: Experience with agile and test-driven development (e.g. Scrum)
- ✓ Experience in working in a global distributed environment
- ✓ Project Management certification: e.g. PMP, IPMA or Scrum Master
- ✓ Master's degree or higher in Mathematics, Engineering and/or Computer Science

Required skills

- ✓ MUST HAVE: 5+ years working with banks as an external service provider
- ✓ Experience in the crypto and digital assets space preferred
- ✓ Entrepreneurial, proactive personality
- ✓ Very strong communication and presentation skills and fluent in English
- ✓ Strong analytical, structured and result oriented
