wyden

22 November 2022

Wyden (previously AlgoTrader) is a fast-growing scale-up and the global leader in institutional digital asset trading technology. It is the prime solution partner for banks and other sell-side firms for digital asset and crypto execution management in addition to its leading position as the first fully integrated algorithmic trading software solution for quantitative hedge and crypto funds on the buyside.

Wyden has also just been voted the #1 scale-up in Switzerland.

By covering the entire trade lifecycle and supporting seamless custody, core banking and portfolio management system integration as well as full trade lifecycle automation, the Wyden platform streamlines digital assets trading. Engineered by a team of trading system veterans and crypto asset experts, Wyden offers best-in-class integrated infrastructure solutions that meet the highest institutional needs. Wyden also offers consulting services to assist with the timely implementation of both Wyden solutions. Our typical clients are Banks, Hedge Funds, Asset Managers, Crypto Funds, Prop Trading Groups and Brokers.

Headquartered in Zurich, Switzerland, we have regional offices in New York and Singapore as well as development teams in Eastern Europe.

We're searching for a

ReactJS Developer – Frontend Engineer

Job overview

You will be part of the AlgoTrader core development team in Poland. You will be working on a recently launched (August 2022) project that aims to build a widget-based UI that will serve as the trading and hedging GUI of a new microservice solution. You'll be able to work with the most recent technology and deeply impact user experience and the overall design of features and work flows.

We have offices in Poznan and Wroclaw. We are also open for teleworkers. You need to come to one of the offices every few months for workshops, social events etc.

Responsibilities

✓ Technical proof of concepts
✓ Designing new widgets
✓ Creating and consulting UI designs
✓ Reviewing code
✓ Building comprehensive test-suites

Tech stack

✓ Typescript 4.x
✓ React 18.x
✓ Redux Toolkit 1.8
✓ Material UI 5.x
✓ AGGrid 28^
✓ GraphQL 3.x
✓ Cypress 10^
✓ Vite 3.x

Knowledge and experience

✓ MUST HAVE: Experience in Typescript and React
✓ MUST HAVE: Experience with Agile and test-driven development
✓ MUST HAVE: Hands-on experience with Git
✓ MUST HAVE: Prior experience in heavy-load websocket-based apps
✓ MUST HAVE: Strong communication skills and fluency in English
✓ At least 5 years' hands-on professional experience in frontend development
✓ Experience working in a distributed global environment
✓ Ideally prior exposure to trading and capital markets

The team

✓ We welcome diversity in all forms. We embrace strange and risky ideas and appreciate characters of all sorts.
✓ We hold each other accountable and work to a high standard. We take pride in the frequent, safe, and graceful delivery of innovative and valuable features.
✓ We embrace open communication and challenge. We appreciate positivity and vigilance and strive for autonomy, trust, and personal and professional growth.
